

# 3/4 INCH SHOOTER/ATTACK/BOMB GLASS

AOTSG1216L

Armoured One's 3/4-inch tactical security glass is shooter/attack/bomb/bullet resistant. This glass carries stronger security than our thinner security glass. This type of glass is a great option for new construction or remodel projects, where glaziers can use standard sized vision kits and drop our AOTSG1216L right into place. Our glass, when placed in a recommended location, will slow down or deter an attack who is trying to gain entry through the glass with force or a gun.

## RECOMMENDED USES

We recommend this glass for interior locations, such as second set of vestibule doors, classroom interior doors, office doors and other interior areas where fire rated glass is not required.

Thickness

3/4"

Glass Weight

10lbs sq/ft

Construction

Proprietary

Maximum Size

72" X 96"

Warranty

10 Year Limited

# 3/4-INCH SHOOTER/ATTACK/BOMB RESISTANT SECURITY GLASS

## BOMB BLAST & EXPLOSIVE PROTECTION

Bomb blast or explosions can cause glass shards to become lethal objects. Armoured One's Tactical Security Glass is bomb blast and explosive resistant, reducing the amount of flying glass.

## FORCED ENTRY & BURGLARY RESISTANT

Attackers target glass for easier access into a building. Armoured One's Tactical Security Glass is designed to slow down any attacker from being able to gain entry by withstanding multiple hits.

## SAFETY GLAZING & GLASS BREAKAGE

Armoured One's Tactical Security Glass reduces the amount of injury due to human contact from broken glass. Our glass meets safety glazing codes to reduce the risk of pieces injuring people.

## BURNING CHARACTERISTICS

Armoured One's Tactical Security Glass meets standard test methods for Surface Burning Characteristics of Building Materials. Our glass helps reduce the spread of fire, allowing more time for evacuation procedures to take place.

## WIND DEBRIS

Armoured One's Tactical Security Glass is wind debris resistant. Our glass has passed tests for small missile projectiles that simulate wind debris that could hit glass during strong winds, such as hurricanes.

## SHOOTER/ATTACK CERTIFIED

Armoured One Tactical Security Glass is the first to be tested with a standard based on the history of active shooters. This test is designed to simulate an average active shooter scenario.

\*AOTSG1216L is an approved product that meets all standard building requirements for safety on non-rated applications.

## 3RD PARTY TESTING

GSA Level 2  
ASTM F1642
