

ARMOURED ONE

Staying One Step Ahead

Did You Know?

SAFETY FILM

VS.

SECURITY FILM

-  Safety Film provides for the reduction of risk or the occurrence of injury, loss, or death from **accidental or natural causes**.
-  Safety Film is designed to protect people from flying shards of glass if the the glass is broken.
-  Safety Film is not designed to withstand an attacker with a gun.

-  **Security Film** provides for the reduction of the risk or occurrence of injury, loss, or death from **the intentional actions of man**.
-  **Security Film** is designed for anti-intrusion and will substantially delay and/or prevent the entrance of an intruder.
-  **Security Film** will give more time for people to get to safety and for emergency teams to arrive.

THE ARMOURED ONE ADVANTAGE

 Armoured One Is the first **SECURITY GLASS AND FILM** to be tested with a standard based on the history of active shooters.

 Armoured One's Security Film and Glass are the first to pass a Class 1 UL Observed Shooter Attack Test.

 23MIL film is the thickest on the market.

 Independent testing observed by UL.
